

JOHN J. STEUBY COMPANY

ABOUT US

MANUFACTURERS OF PRECISION MACHINED PARTS & ASSEMBLIES

QUALITY & PRECISION

MADE IN THE USA

Our Mission: to produce an increasing quantity of quality turned parts to the satisfaction of all our customers, at a reasonable profit that will assure growth, excellence, and continuity for the betterment of our employees, the community and the society in which we operate.

QUALITY ASSURANCE

ACCURACY

The task of engineering is to make it work once, while the task of Quality Assurance is to make it work all the time.

PLANT & EQUIPMENT

INVESTMENT

Our facility is over 144,000 square foot, and has over 100 employees, running two shifts and hundreds of precision manufacturing machines make the company a high volume, high quality leader in the industry.

SCREW MACHINES

EFFICIENCY

To produce high volume at low cost you need the right machines. Steuby does:

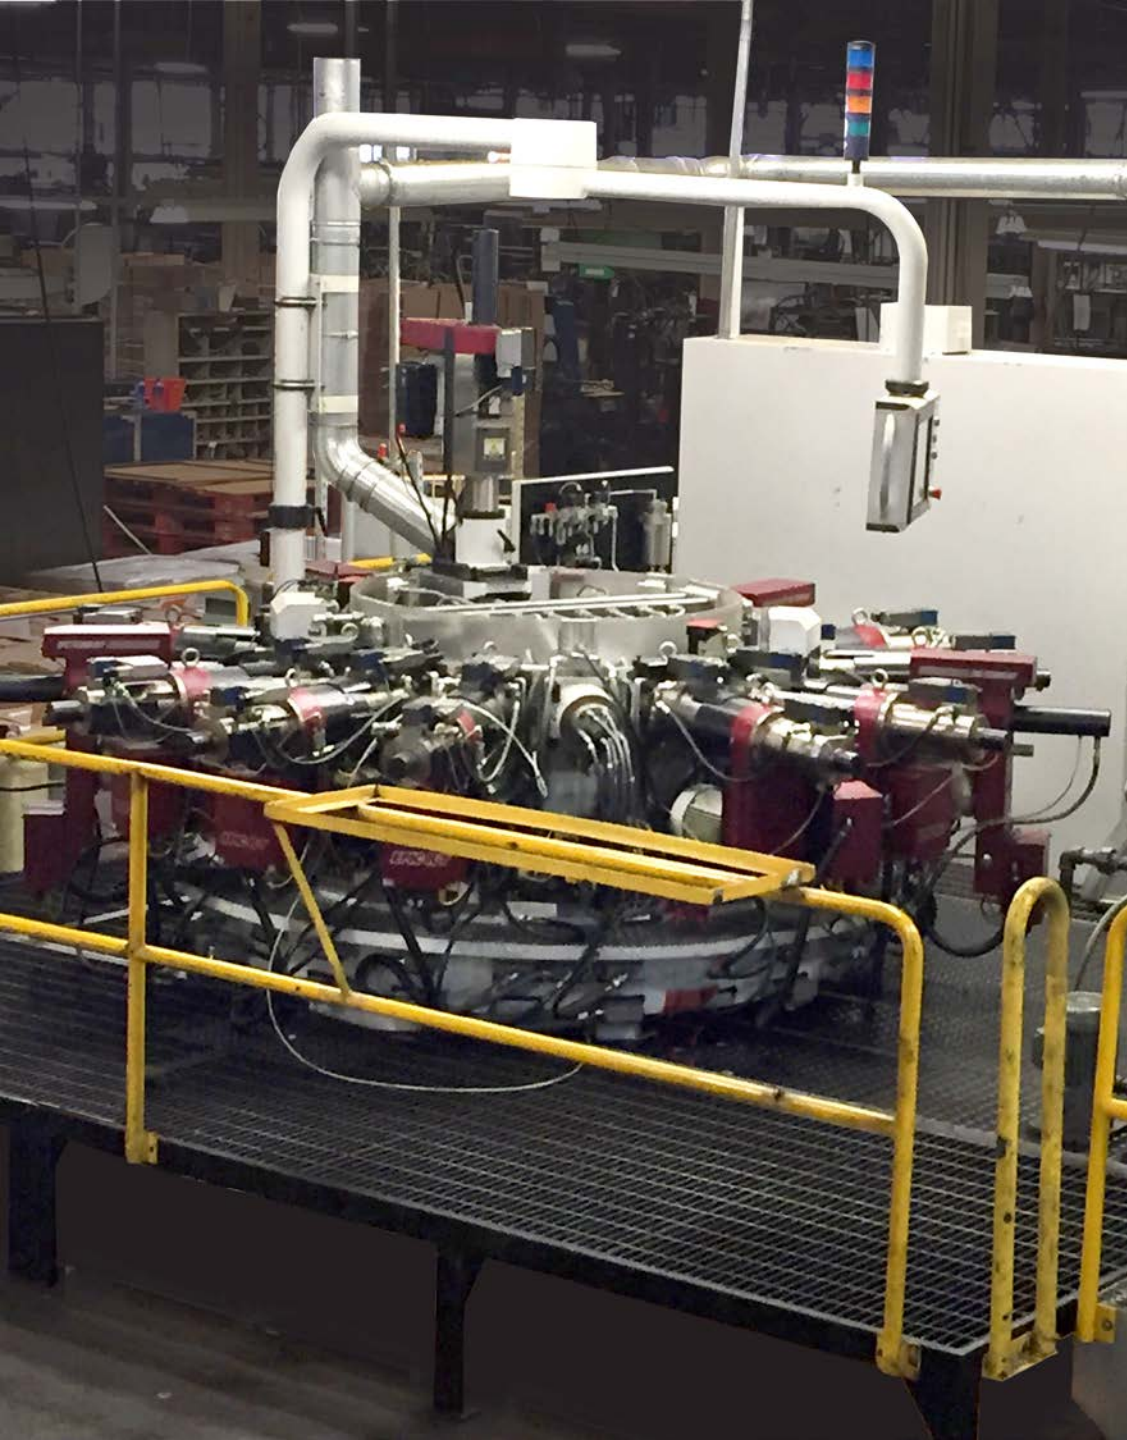

27 Davenports

42 New Britians

17 Conomatics

25 Acmes

CNC HYDROMAT

FLEXIBILITY

Hydromat machines utilize modular systems that provide tremendous versatility and flexibility with tool-spindle units, rigidly mounted around a precision cast base with high-precision machining of all critical surfaces, ultimately providing tremendous versatility and flexibility. We have 25 Hydromats.

CNC SWISS

TIGHT TOLERANCES

This CNC Swiss type lathe is advantageous on long, slender parts, parts with extremely tight tolerances, complex parts, and parts made from difficult to machine materials.

Our CNC Swiss department has 32mm, 20mm, and 16mm Citizen machines all with bar loaders.

CONTRACT MANUFACTURING

YOUR BRANDING

As the contract manufacturer we are generally presented with a design or concept. We quote the parts based on processes, labor, tooling, and material costs. Once engaged, we act as the factory for our client, producing and shipping units of the design on behalf of the client.

VERSATILITY CAPABILITIES

Our plant, equipment and long experience allow us the to manufacture a wide variety of precision machined parts and assemblies.

QUICK DISCONNECTS

BEST IN THE INDUSTRY

The variety of quick disconnect couplers, schraders, gas couplers, straight throughs, elbows, molds and industrial products is only possible with the right mix of machining, knowledge and experience. All quick disconnect products are leak decay tested.

OUR EMPLOYEES MAKING IT HAPPEN

Our 100+ employees are a mix of veteran 25 year+ Steuby employees and younger Steuby trained employees. Our diverse and trained workforce is dedicated to make your high quality product/project on-time and within budget.
